Polishing

Magnesite Bonded Fickerts

Green and Black Super fine silicon carbide Fickerts with advanced Italian technology suits for polishing of granite and gress vitrified ceramics.

Premium first quality grains and special magnesite bond system deliver the superior cutting action with unmatched surface clarity and quality.

Polishing oxide bonding system penetrates deep into the stones surface for deeper polishing effect and also works on minimal pressure, ensuring damage free polishing.

Features	Advantages	Benefits
First quality silicon grains	Sharp edges and high purity	Faster cut and longer life at low pressure
Oxide bonding	Deeper polish	Always first quality polish & premium range.
Universal holders	Adaptability	Suits for all material & machines
